Helping Every Student Succeed
ESSA funding opportunities for Scantron solutions and services

The Every Student Succeeds Act of 2015 reauthorizes the Elementary and Secondary Education Act of 1965, and reverses some of the controversial provisions from the 2002 No Child Left Behind Act, granting greater flexibility to states, districts, and schools. In particular, ESSA focuses on "the clear goal of fully preparing all students for success in college and careers."

With more than 40 years of experience in education, Scantron is committed to supporting your transition to ESSA through our assessment solutions and services:

- Scantron supports college- and career-ready standards with:

  › An assessment platform that directly aligns items with your chosen education standards.

  › Expert consulting, development, and research services to support your internal assessment efforts.

  › Rigorous items for core college-ready subjects and career technical education.

  › Reporting that demonstrates student progress towards attaining your chosen educational standards.

- We help you prepare for state summative assessments by providing custom benchmark and interim assessment results you can use to reduce testing time, connect to instructional resources, and measure student progress.

- We can help you develop local assessment pilots to expand your assessment footprint beyond core subjects and traditional testing methods.

- We support your state accountability efforts with analytics solutions that unify all your student data without the need for a data warehouse, so you can view and track multiple measures and identify at-risk students more easily.

- Our Reading and Mathematics Foundations tests in Ascensus Growth deliver items with professionally-recorded audio for pre-readers and connect to age-appropriate instructional resources to support your connections between early childhood and early elementary education efforts.
